Please note: The terms in which NCR courses are offered are subject to change. Advisors and students will work together to monitor the Plan of Study to insure that all program requirements are met.

The above Program of Study is suggested for students who have an earned Master's in Nursing degree with a focus in Advanced Practice Nursing as a Nurse Practitioner. During the first semester of enrollment in the Doctor of Nursing Practice program, the student and his or her academic advisor will develop an individualized plan that is based on the student's prior graduate course work and stated career goals and is consistent with *The Essentials of Doctoral Education for Advanced Nursing Practice* (AACN, 2006). The original plan and any variation from it after matriculation must be approved by the advisor and by the Program Chair.
